## The Lifelong Learner Whitewall Creativity Kit

This kit has been created and designed particularly for the Grade RR learner in mind. It promotes gross motor skills, fine motor skills, hand-eye coordination, crossing of the midline, colour recognition, maths skills and lots more, while still allowing young children the freedom of creative play within a holistic environment. Gross motor skills are foundational skills which need to be developed in the early years. They are skills that involve bigger movements using the large muscle groups such as the arms and legs.

In the early years it is vital to create an environment which supports learners in their development of the above-mentioned skills. When implementing this kit and activity manual together in a Grade RR environment, children will be given the opportunity to engage with their teachers and peers in an exciting, fun and creative manner which will lead to them building strong thinking and reasoning abilities which are essential for them in the modern world.

This kit allows young children to explore through concrete learning as learners learn best through their physical senses like touch and see. When young learners are physically involved in the learning process their retention of the concepts taught increases, which is exactly what the Lifelong Learner Whitewall Creativity kit does. The Whitewall kit allows a shift from teacher centered teaching to learner centered form of learning and teaching. It allows the teacher the opportunity to take every day concepts which are often taught at the learner's desk and turns it into a fun, physical and holistic learning process using the whitewall. It also allows the teacher to view all learners work at the same time and see that all learners are developing the skill that is planned for that lesson on the whitewall. The Lifelong Learner Whitewall Creativity Kit will also help teachers to eliminate future learning problems such a gross motor, fine motor skills and identification skills as they are able to view many learners work at the same time while learners are using the whitewall.

### Specific, powerful and positive learning outcomes for young learners when working with Lifelong Learner Whitewall Creativity Kit include:

- Improved number recognition in early childhood years.
- Introduction of bilateral coordination and visual motor integration.
- Mastery of colour and simple 2D shape identification.
- Promotes development of early childhood fine motor and gross motor skills.
- Development of strong hand-eye coordination and crossing of the midline
- Positive impact on letter recollection and formation.
- Encourages turn taking, working together and social interactions with their peers.
- Development of pre-writing skills: line and circle.

# Grade R

## The Lifelong Learner Whitewall Creativity Kit

This kit has been created and designed particularly for the Grade R learner in mind. It promotes the development of gross and fine motor skills, hand-eye coordination, midline crossing, colour recognition, maths skills and school readiness. It addresses these skills while still allowing young learners the freedom of creative play within a holistic environment. Gross motor skills are skills that involve bigger movements using larger muscle groups such as the arms and legs and are foundational skills which need to be developed early on in a child's development. Fine motor skills are the coordination of muscles in movement with the eyes, hands and fingers. Crossing the midline is vital to the development of using both sides of the body together.

In Grade R it is vital to create an environment that supports learners in developing the above-mentioned skills. Using this manual and kit will allow children the opportunity to engage with their teachers and peers in an exciting, fun and creative manner. This, in turn, will promote the building of well-developed thinking and reasoning abilities, which are essential in the modern world.

When young learners are physically involved in the learning process, their retention of the concepts taught increases, which is exactly what the Lifelong Learner Whitewall Creativity Kit does. It facilitates a shift from teacher-centered education to a more learner-focused experience. It allows the teacher to turn everyday concepts, which are often taught at a learner's desk, into a fun, physical and holistic learning process using the whitewall. This will assist the teacher in developing the skill that is planned for that particular lesson and attempts to minimise future learning problems such as gross motor, fine motor and identification skills. Due to the nature of the whitewall kit, many learners will be using the whitewall altogether, which allows teachers to monitor multiple learners' work simultaneously.

### Specific, powerful and positive learning outcomes for young learners when working with Lifelong Learner Whitewall Creativity Kit include:

- Improved number recognition.
- Introduction of bilateral co-ordination and visual motor integration.
- Mastery of colour and simple 2D shape identification.
- Development of fine motor and gross motor skills.
- Development of strong hand-eye coordination and midline crossing
- Positive impact on letter recollection and formation.
- Encourages turn taking, working together and social interactions with their peers.
- Development of pre-writing skills: line and circles.
- Promotes identifying and reading Consonant Vowel Constant (CVC) words, sight words, numbers and colours.

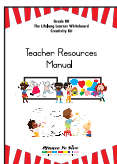

### Activities for the year:

	TERM: 1	TERM: 2	TERM:3	TERM:4
Week: 1 & 2	Learning the formation of lines	Copying the pattern	Matching the beginning sound to the picture	Addition flashcards
Week: 3 & 4	Drawing the number of dots next to the number	Tracing and writing names	Opposites	CVC word slap
